ABUJA WEB SERVICE LTD

COPANY PROFILE

Introduction

Abuja Web Service Ltd is a premier IT solutions provider headquartered in Abuja, Nigeria. We deliver innovative digital services that empower individuals, businesses, and institutions to thrive in the digital economy. Our mission is to combine creativity, technology, and strategy to drive measurable success, while our vision is to be Africa's most trusted digital partner.

Corporate Objectives

The objects for which the Company is established are:

- **Computer Programming & Consultancy** – To carry on the business of computer programming consultancy, software development, and IT advisory services.
- **Web Development & Hosting** – To engage in web development, website design, hosting, management, and maintenance services for individuals, businesses, and institutions.
- **Systems Integration & Cloud Solutions** – To provide systems integration, database design, cloud solutions, and application development across multiple platforms.
- **Communication Technology Services** – To offer digital platforms, networking solutions, and online collaboration tools.
- **Training & Capacity Building** – To undertake training, capacity building, and professional development in information and communication technologies.
- **Technical Support & Maintenance** – To provide technical support, managed services, and maintenance for software, websites, and IT infrastructure.
- **E-Commerce & Digital Marketing** – To engage in e-commerce solutions, digital marketing, and online business platforms.
- **IT Project Management & Consultancy** – To carry on the business of IT project management, consultancy, and advisory in digital transformation.

- **Mobile & Enterprise Solutions** – To design, develop, and manage mobile applications, enterprise software, and cloud-based solutions.
- **Research & Innovation** – To engage in research, innovation, and development of emerging technologies including artificial intelligence, cybersecurity, and data analytics.
- **Consultancy & Training Services** – To act as consultants, trainers, and service providers in all matters relating to information technology, communication systems, and digital business.
- **Ancillary Activities** – To undertake all lawful activities incidental or ancillary to the attainment of the above objects.

Core Values

- **Innovation** – Driving creativity and new solutions.
- **Integrity** – Operating with transparency and trust.
- **Excellence** – Delivering world-class standards.
- **Customer Focus** – Tailoring solutions to client needs.
- **Sustainability** – Building long-term digital resilience.
